

**Professor Fiona Gilbert**, Head of Department of Radiology, University of Cambridge, Cambridge, UK

Professor Gilbert is Head of Department of Radiology at the University of Cambridge. Her role is to provide leadership to the diverse imaging community at the university and she is responsible for imaging research and radiological undergraduate teaching. Professor Gilbert's clinical work and research is focused on all imaging techniques relating to breast cancer and oncology. She is interested in multimodal functional imaging with MRI and PET of the tumour environment using breast cancer as a model and correlating this with the tumour genetic profile. She also undertakes research in Tomosynthesis and contrast enhanced mammography. She maintains a strong interest in musculo-skeletal imaging.

She is Chair of the Academic Committee of the Royal College of Radiologists, and immediate past Chair of the Royal College of Radiologists Breast Group. She is Chair of the NCRI Imaging Advisory Group and was co-lead of the NCRI PET Research Network. She is also on a number of advisory panels.
