

**Dr Masako Kataoka** completed her PhD at Kyoto University Graduate School of Medicine, Japan in 2005 under the supervision of Prof. Kaori Togashi, she had been involved in collaboration project of breast imaging (MMG) between Department of Radiology and Epidemiology, in Cambridge for 5 years. Since I came back to Kyoto Japan, having been in charge of breast imaging team in the department. The current research topics include ultrafast DCE MRI, diffusion-weighted imaging of the breast, and dedicated breast PET. Masako is also involved in the guideline committee of Japanese breast cancer society and radiological society.
