

Dr Matthew Wallis, Breast Unit, Cambridge University Hospital, UK

Director of the Warwickshire Solihull and Coventry Breast Screening Service for 19 years. At various times, Clinical Director for Radiology and Clinical Support Services. 12 years as Quality Assurance Radiologist for the West Midlands NHSBSP.

He moved to Cambridge in November 2007. President EUSOBI 2008-2010

His major research interests have been in optimising diagnosis and care of breast disease, developing methods to monitor and audit screening performance. This work has informed standard setting in image quality, radiology and surgery across the world. He has a long-standing interest in DCIS and is the Chief Investigator of Low risk DCIS trial.
