

Dr Penelope Moyle, Consultant Radiologist at Cambridge University Hospital UK

I am a specialist interest in Breast Imaging. I have been Clinical Lead for the Cambridge Breast Unit since 2014 and was Director of Cambridge & Huntingdon Breast Screening 2013-2019.

I am currently involved in research projects, which include contrast, enhanced mammography, and interval cancer and automated breast ultrasound. I am involved in service improvement locally and nationally including promoting the use of Vacuum excisions in a Parliamentary committee. I write modules for the Radiology Integrated Training Initiative (R-ITI) and peer review articles for journals such as European radiology and Clinical Radiology.

I have spoken at national and international conferences on topics such as interval cancers, performance management, Duty of Candour, contrast enhanced mammography and oncoplastic breast surgery for radiologists.
